

Teslar

Teslar is an end-to-end solution that has been creating highly efficient banks for over 10 years by providing simple and easy to use technology that empowers bankers to do what community bankers do best, better serve their local communities and customers. By providing a single platform that allows everyone from the teller to the CEO quick access to the information they need allows them to not only provide the customer with a better experience, but easily manage a growing portfolio without having to expand staff. Fully integrated to your core, imaging, and other key vendors, Teslar helps ensure your staff are equipped with the tools to operate more efficiently.
